

Brightspace Plugin Administration Help

Adding the Planet eStream remote plugin to your Brightspace installation adds a Planet eStream options to the "Insert Stuff" button available in the Brightspace text editor, providing a quick and easy way of adding Planet eStream content to your Brightspace Virtual Learning Environment.

The Plugin can be used to add the following types of Planet eStream content; Recordings, Documents, Quizzes, Chapters, Playlists, and Photosets.

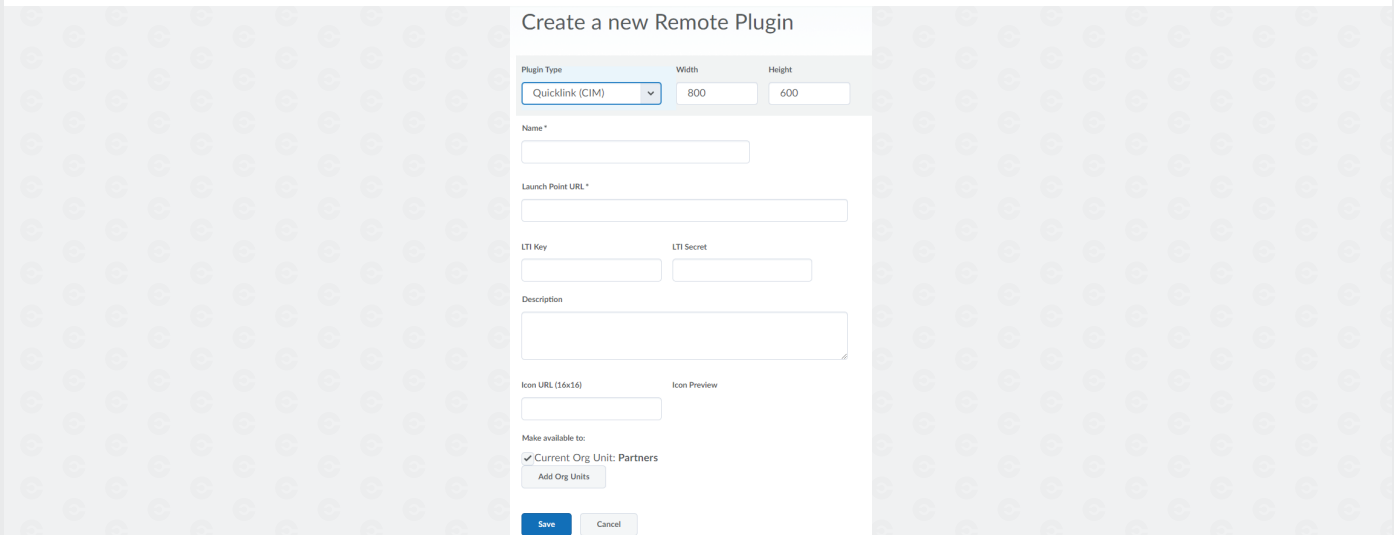

Additionally, Video/Audio content can be added to your Planet eStream archive from within Brightspace and directly embedded into the Brightspace page.

Installing The Planet eStream Brightspace Plugin

Before installing the Plugin, please take a note of the Brightspace Consumer Key and Shared Secret provided in the VLE Options section of the Planet eStream Administration Console. See Installation & Configuration within Planet eStream, below.

In Brightspace, find and click the "Manage Remote Plugins" button.

Add a new remote plugin.

The screenshot shows a form titled "Create a new Remote Plugin" with the following fields and options:

- Plugin Type:** A dropdown menu with "Quicklink (CIM)" selected.
- Width:** A text input field containing "800".
- Height:** A text input field containing "600".
- Name:** A required text input field.
- Launch Point URL:** A required text input field.
- LTI Key:** A text input field.
- LTI Secret:** A text input field.
- Description:** A large text area.
- Icon URL (16x16):** A text input field.
- Icon Preview:** A small square area for the icon preview.
- Make available to:** A section with a checked checkbox for "Current Org Unit: Partners" and an "Add Org Units" button.
- Buttons:** "Save" and "Cancel" buttons at the bottom.

You'll be presented with a form to create a new remote plugin, shown above. Fill out the fields with the following values:

Launch Point URL: Your Planet eStream URL in the following format: <https://YOURURL/VLE/D2L/Default.aspx>

Plugin Type: Insert Stuff. Make sure this is NOT the "CIM" option.

Name: End users will see this when selecting which plugin to add content from. You could use 'Planet eStream' or something more specific to your institution.

LTI Key: The key from your plugin options page (see below).

LTI Secret: The shared secret from your plugin options page (see below).

Description: Choose a description for the plugin. As a default, we recommend "Insert Planet eStream items into Brightspace".

Make sure you select which 'org units' to add the plugin to, then click 'Save'.

Installation & Configuration within Planet eStream

From within the Planet eStream Website Administration Console, click Plugin Options and then select Desire2Learn / Brightspace from the drop-down list.

If the option is not present, click the Licence Keys link and enter your Brightspace Plugin Licence Key. Please contact Planet eStream support if you have not yet requested/received your key.

Your Brightspace Plugin Options will appear. These are:

User Mapping

If User Mapping is enabled then Planet eStream will attempt to map the username provided by Brightspace firstly to a Planet eStream Built in user, then to an Active Directory user.

If User Mapping is successful then the Brightspace user will receive the same search results when searching your Planet eStream archive via the Brightspace Plugin as they would if they had performed the search directly on your Planet eStream website.

Default User

As an alternative to User Mapping, Brightspace users can be authenticated as a single Planet eStream built-in user.

We would advise creating a new Planet eStream user for this purpose.

The Default User is also used if User Mapping is turned on but fails to map users between Brightspace and Planet eStream.

Dimensions

Enter the desired Width and Height of Planet eStream items that are embedded within your Brightspace environment. Any changes to these values will affect newly added content only, the dimensions of any Planet eStream items already embedded within your Brightspace will remain unaltered.

Consumer Key / Shared Secret

The Consumer Key and Shared Secret are required when installing the Plugin within your Brightspace site. Please see Installing The Planet eStream Brightspace Plugin, above, for details.
